Baum/Bäume gepflanzt in **Project Reforest the Amazon Basin, Brazil**

The year 2020 set a new record for deforestation in the Amazon basin. The Rondonia state is the main target for illegal Amazon logging. CES Rioterra is dedicated to the reforestation of these areas and developed this project together with Tree-Nation. Last planting season we planted over 40,000 trees and continue planting now more than 30,000 trees, thus contributing to combating climate change, biodiversity loss and other environmental damages.
